PROFESSIONAL SUMMARY

Senior Software Engineer with 3+ years of end-to-end mobile delivery across AI-powered education, healthcare, social media, and clinic management domains. Currently building an AI-driven Arabic EdTech platform serving 20,000+ K-12 students with real-time AI tutoring, voice chat, and interactive whiteboards. Shipped 7+ apps on App Store and Google Play across Egypt, Germany, UAE, and the United States. Full-stack capable: Dart/Flutter front-end, Node.js/Express back-end, AWS + Docker/Nginx deployment. Proficient in AI-assisted development, leveraging AI code agents to accelerate delivery while enforcing Clean Architecture, SOLID principles, and production-grade code quality.

EXPERIENCE

Senior Software Engineer | Appenza Studio | Full-Time | Egypt Feb 2025 – Present

Faheem (فهييم) — AI-powered Arabic educational platform for 20,000+ K-12 students (iOS & Android)

- Developing core AI features: real-time AI tutoring chat (Azure OpenAI via WebSocket streaming), voice AI tutor (STT/TTS), and AI Magic Board with generated educational visuals and Bloom's taxonomy integration.
- Building adaptive Smart Quiz System with AI-powered question generation, plus a camera-based Solve feature for step-by-step math/science problem solving.
- Implemented Clean Architecture (Data → Domain → Presentation) across 16 modules with Provider, flutter_modular DI, Dio with custom interceptors, and dartz Either error handling.
- Integrated full Arabic RTL localization, Firebase Analytics (~52 events/14 modules), Crashlytics, FCM push notifications, and multi-environment builds (Dev/Staging/QA/Prod).
- Built gamification layer (wallet & points economy), study materials player (video/audio capsules + WebView), and onboarding with social sign-in (Google, Apple) and OTP authentication.
- Leveraging AI code agents (vibe coding) to accelerate development velocity while maintaining strict Clean Architecture standards, guiding AI-assisted code generation to produce well-structured, testable, and maintainable code across all feature modules.

Software Engineer | Dib GmbH | Full-Time | Germany (Remote) Sep 2024 – Jan 2025

IMOX — Social e-commerce platform where sellers publish products as short reels and buyers discover and shop via video

- Optimized startup and product reels performance via lazy initialization and multi-layer caching; rebuilt pagination with prefetch pages for seamless infinite-scroll shopping experience.
- Migrated deep linking from Firebase to Airbridge (incl. deferred deep links) improving product attribution and seller conversion tracking; implemented Mixpanel analytics (identity, events, funnels) for data-driven decisions.

YOLO — Clinic management system for large healthcare facilities: HR, doctors, patients, appointments, inventory, and billing

- **Cut app size from 86 MB to 51 MB (~41% reduction)** via build optimizations, asset compression, and dependency auditing.
- Shipped 10+ client-requested features across multi-region deployments (Egypt, Germany, UAE) with improved performance across appointment scheduling, HR management, patient records, and clinic inventory flows.

Software Engineer | Revealsite | Part-Time | United States (Remote) Nov 2023 – Feb 2025

JD Pharmacy | Medical Central | Quick RX | Holland Pharmacy — Healthcare apps

- Built and maintained 4 pharmacy apps with prescription refill/transfer workflows, appointment scheduling, and configurable dose reminder notifications.
- Coordinated across backend, UI/UX, and business teams ensuring product quality and compliance with healthcare standards.

Software Engineer | Zeyada | Full-Time Apr 2023 – Sep 2024

School management app — Payments, real-time chat, parent-school communication

- Built real-time chat system (1-to-1 and group messaging) with mute/block/clear controls; integrated PayTabs SDK for secure fee processing.
- Implemented Guardsquare for app shielding and tamper detection; integrated GraphQL with Magento e-commerce backend for in-app school store.

PROJECTS

Xera Lab Website | Flutter Web, Node.js, Express, PostgreSQL, Docker, AWS S3, Nginx

Dental X-ray case management — Customer portal + Admin dashboard with RBAC

- Built two Flutter Web apps with role-based access (Admin/Doctor/Technician) and full workflow: intake → assignment → review → delivery. Developed Node.js/Express + PostgreSQL backend with JWT auth; deployed with Docker Compose, Nginx (TLS), and AWS S3.

Jaweb | Flutter, Clean Architecture, My Fatoorah

Interactive quiz/trivia game (Google Play | App Store)

- Built from scratch: 2 teams, 6 categories, 3 difficulty levels, in-app referee, automatic scoring. Integrated My Fatoorah for in-app purchases (cards, Apple Pay, Google Pay) with server-verified transactions.

FasTap | Flutter, Flutter Web, Firebase, NFC, Nginx

NFC-powered digital business card platform (Google Play | App Store | Web)

- Built Flutter app writing profiles to NFC cards for tap-to-share; implemented Flutter Web profile page triggered on NFC scan; deployed on VPS with Firebase and Nginx.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Flutter Web, Bloc, Riverpod, Provider, Firebase (Auth, Crashlytics, Firestore, FCM), Hive, Guardsquare, Deep Linking

AI & Real-Time: Azure OpenAI, WebSocket Streaming, Speech-to-Text, Text-to-Speech, AI Image Generation, AI Code Agents (Vibe Coding)

Backend: Node.js, Express, Sequelize, REST APIs, GraphQL, Swagger/OpenAPI, JWT, OAuth2

Cloud & DevOps: AWS (S3), Nginx, Docker, Docker Compose, CI/CD (Codemagic), VPS Hosting, DNS

Data: PostgreSQL, MySQL, MongoDB, Firestore, Hive

Analytics & SDKs: Mixpanel, Airbridge, Firebase Analytics, PayTabs, My Fatoorah

Practices: Clean Architecture, MVC, SOLID, Design Patterns, Agile/Scrum, Code Review

Tools: Git, GitHub, Bitbucket, Confluence, Trello, Jira, Azure DevOps

EDUCATION

B.Sc. Computer Science and Artificial Intelligence 2019 – 2023

Helwan University, Cairo, Egypt | GPA: 3.48 / 4.0

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Database Systems

LANGUAGES

Arabic (Native) | **English** (Professional Working Proficiency)
